# Plant: Mait Midi Drill

## Piling Rig

The Midi Drill has been designed to guarantee better productivity in the drilling of medium diameter holes, with maximum running economy.

Its moderate size allows easy transportation and use on the jobsite. Another great feature is that the Kelly bar doesn't have to be removed for transport so it reduces set up time.

The Midi Drill is ideally suited to complete bored piles in restricted access areas. Its slender proportions allow it, for example, to operate with single lane road closures.

Progress is tracked via an electronic depth counter.

A full range of tools, augers, buckets, SPT equipment, bailers, core barrels, Belling buckets, etc are available.

## Stats

Working Width	2.25m
Working Length	4.53m
Working Height	7.2m
Max Torque	3.5 tonne/m
Hole Diameter	400—900mm +
Hole Depth	22m
Machine Weight	~14 tonne
