EXCAVATING DRILLING & PILING ENGINEERING STEEL

Plant: Hitachi TH55 Crane

Multipurpose Piling Crane

The Hitachi TH55 Piling Crane is a versatile unit, transportable on a four axle transporter and able to complete both driven timber, steel and concrete piles. Using either a hydraulically powered freefalling hammer or a conventional drop hammer. An additional crane drilling table can be installed to complete bored piles. It can also be used as a service crane.

Stats:

Working Width (adjustable track width)	2.8m-3.3m
Working Length	5.2m
Working Max Height	18m
Working Radius	18m
Transporting Height	3.2m
Max Hammer Drop	1.2m
Maximum Pile Length (without predrill)	15m
Machine Weight	30 ton
Total Hammer Weight	2.0 ton or optional 4.0 ton drop hammer
Energy per blow (adjustable Nm)	0-23,000
Hydraulic Hammer Efficiency	95%
Drill Diameter	400mm-1500mm
Max Drill Depth	32m
