Project: Burwood Hospital Stage 1 & 2

Stage 1 : Enabling Works

This package of works included:

- Creating the northern carpark, including land clearance, tree felling, drainage, waterman installation, landscaping and electrical works for lighting.

Stage 2 : Building Excavation

- Building excavation, which included site clearance, removing 26,000 m³ of spoil and laying 15,500 m³ of hard fill to create an engineered gravel raft foundation slab which included Geogrid.
- Road widening and drainage to both Marahau Road and Burwood Road frontages.
